Avira Mac Os X Download

However, as the worldwide market share of Mac has significantly increased, the malware threats targeting Mac OS have increased, also, so Mac users are inadvertently spreading Windows viruses in heterogeneous computing environments. ... Because of the much smaller number of Mac users in the world, hackers didn't bother targeting Apple desktops and laptops. ... Download Avira Free Mac Security: Avira Free Antivirus for Mac OS X - There was once a time when Mac OS X users enjoyed "security by obscurity". In response to this growing threat, Avira has made Avira Free Mac Security truly free for everyone - private consumers, professionals and even businesses - without exception and without any advertising or marketing pop-ups.
